

Car seats save lives!

Do you know if the children you care for are safely secured in their car seats?

In Hamilton, 9 out of 10 children are not travelling safely in their car seats.

You can take action to make sure the children you care for are safe on the road.

1. Always read the car seat and vehicle manuals to find important information about installing your car seat at every stage.
2. Learn how to secure children in their car seats by watching a video (www.infantandtoddlersafety.ca) or come to a free evening education session run by the City of Hamilton.
3. Get your car seat checked by a car seat technician.

Stay tuned for our car seat campaign coming in spring 2013!

To register for a car seat evening education session or to find out where to get your car seat checked call **Health Connections** at **905-546-3550**.

Be sure the children you care for are secure!
